Professional Summary

Final-year Computer Science and Engineering undergraduate with hands-on experience in **full-stack development, and UI/UX design**. Skilled in building responsive web applications, REST APIs, and user-friendly interfaces using React and Java. Experienced in developing real-world projects and participating in hackathons. Seeking an entry-level Software Engineer or Full-Stack Developer role to apply my skills and grow with a collaborative team.

Education

Bachelor of Engineering (B.E.) — Computer Science and Engineering **2023-2027**
Dhirajlal Gandhi College of Technology (DGCT) | CGPA: 8.32 *Salem, Tamil Nadu, India*

Higher Secondary Education (HSC) **2022-2023**
Vethathiri Maharishi Matriculation Higher Secondary School | PERCENTAGE: 73.5 *Tharamangalam, Tamil Nadu*

Technical Skills

Languages:	Java, JavaScript, Python, C, SQL, Mysql
Frontend:	HTML, CSS, React.js
Backend:	Spring Boot, REST APIs
Tools:	Git, Github, VS code, Figma
Core Concepts:	Object-Oriented Programming (OOP), Responsive Web Design

Technical Projects

Employee Management System (EMS) *React.js — Spring Boot — MySQL*
- Developed a full-stack Employee Management System to streamline employee records, attendance, leave management, and payroll operations.
- Implemented role-based access control with JWT authentication for Employees, Managers, HR Managers, and Super Admins.
- Built a multi-step leave approval workflow and automated payroll generation with downloadable PDF payslips.

Neuro Assist AI *React.js — python — AI*
- Developed an AI-powered mental wellness chatbot providing personalized conversational support and interactive assistance.
- Built a responsive React.js interface with Node.js backend to handle user interactions and AI-powered responses.
- Implemented intelligent conversation features to provide accessible, user-friendly guidance through a seamless web application.

VisualBug *React.js — Node.js*
- Developed an AI-powered UI bug detection web application to automatically identify UI inconsistencies and improve software quality.
- **Selected among the Top 60 teams out of ~1,000 participating teams** at Sakthi Hackathon; also a finalist at Kalam Awards 2025 for the project pitch.
- Built the core detection workflow with React.js and Node.js to compare UI states and flag visual discrepancies.

Mini Projects
- **Quiz App** — Responsive React application with dynamic question handling and real-time score tracking.
- **Weather App** — Web app retrieving and displaying real-time weather data via third-party API integration.
- **To-Do List** — Developed a responsive task management application to add, track, and manage daily tasks efficiently.
- **Bank Management System** — Developed a banking application to manage customer accounts, deposits, withdrawals, fund transfers, and transaction records efficiently.

Certifications

- **Java Programming – Virtual Internship | CodeAlpha | 1 Month** - Gained hands-on experience in Java programming, object-oriented programming concepts, and practical Java development.
- **NPTEL — Programming in Java** — Score: 64%
- **NPTEL — Industrial IoT (IIoT), Elite Plus Silver Certification** — Score: 80%

Achievements

- Top 60 Team — Sakthi Hackathon (VisualBug project) among approximately 1,000 participating teams.
- Finalist, Kalam Awards 2025 — recognized for the VisualBug project pitch.

Additional Informations

- **Languages:** English, Tamil
